

John Gorman
Nightingale Partners LLC
Founder and Chairman

John is the Founder and former Executive Chairman of Gorman Health Group, at the time the industry's leading consulting practice and technology shop. Under John's guidance, GHG created almost a dozen successful spinouts in government health programs and patient care. John's work focuses on Medicare, Medicaid, and Affordable Care Act strategy, governance, and the turnaround of distressed health plans. Prior to founding GHG, John served as Assistant to the Director of Health Care Financing Administration's (HCFA, now CMS) Office of Managed Care, where he provided day-to-day management and served as the external liaison for the Medicare and Medicaid managed care programs. During the 1993 debate on national health care reform, John was chief lobbyist on health care financing issues for the National Association of Community Health Centers, an organization of federally funded primary care clinics for the medically underserved. John's career in Washington began as Press Secretary and Staff Director for U.S. Representative John Conyers, Jr. (D-MI), then Chairman of the Government Operations Committee. John serves on the Board of Directors of Henry Ford Health System's Health Alliance Plan in his birthplace of Detroit, MI, and recently served as Senior Advisor to Premier, Inc., the hospital purchasing cooperative, on Medicare Advantage and Medicaid matters.

Following his successful exit of his 22-year tenure at Gorman Health Group, John founded Nightingale Partners LLC for the express purpose of improving health outcomes for vulnerable patients throughout the United States.

About Nightingale Partners LLC

Nightingale Partners ("NP") is a Washington, DC-based Qualified Opportunity Zone Business and an Opportunity Zone fund. Our primary mission is to improve quality and reduce costs of health care. NP will accomplish our mission by making investments in social determinants of health for vulnerable Medicare and Medicaid beneficiaries to improve their lifestyles. NP acts as the funding vehicle by which investors can invest in revolutionary new social benefits, while also participating in the savings realized by market efficient programing from non-clinical benefits.

NP leverages its expert model advisory team and deep industry relationships to achieve industry disruption. Our goal is to invest \$1 Billion in OZ funding in the next decade, generating shared savings for clients and investors, alike.
